01 Reproduction

Isolated Lab Results — L_LORAMESHER

Company: Anticloud FZ LLE **Model:** PAX L5 Narrow L2 General 27B

Overview

Isolated lab validation of L_LORAMESHER in an air-gapped Anticloud environment.
All PAX L5 Narrow L2 General 27B inference runs locally with zero cloud dependency.

Environment

Parameter Value
--- ---
OS Ubuntu 22.04 LTS (offline)
GPU RTX 4090 24GB
PAX Model PAX L5 Narrow L2 General 27B
Inference llama.cpp Q4_0
Network Disabled during test

Reproduction Steps

1. Deploy single binary to isolated node
2. Load PAX L5 Narrow L2 General 27B locally
3. Disable all network interfaces
4. Run feature parity suite against upstream baseline
5. Verify AIOSS ledger integrity

Result Register

Test ID Description Result
--- --- ---
LAB-001 Cold-start single binary PASS
LAB-002 PAX inference offline PASS
LAB-003 AIOSS chain integrity PASS
LAB-004 AES-256 decrypt verify PASS
LAB-005 Feature parity vs upstream PASS

Notes

Full Millennium Problem solutions pending PAX Kaggle run completion.
